General Questions & Residue Avoidance Advice

Visit www.farad.org

or call 1-888-US-FARAD

FARAD personal provide scientifically-derived answers to residue questions to licensed veterinarians, extension specialist and regulators. FARAD is able to answer questions regarding extralabel drug use, drug regulatory laws, VFD's, requests for drug withdrawal interval and recommendations for mitigating accidental exposure for most major and minor food animal species, including **bees.**

This is a **free service** available to licensed veterinarians, extension specialists and regulators in order to promote chemical food safety.

Bee producers are encouraged to send their veterinarians to FARAD for any questions pertaining to extralabel drug use in bees, including advice regarding the new VFD ruling and minor animal species drug use.

Minor Use Animal Drug Program—
National Research Support Project 7

Minor species are defined by exclusion: any species other than cattle, swine, chickens, turkeys, horses, dogs and cats.

Examples of minor species include bees, game birds, fish, sheep, goats, deer and fur-bearing animals.

The Minor Use Animal Drug Program is designed to address the shortage of FDA approved animal drugs for minor food animal species by funding and overseeing the efficacy, animal safety, and human food safety research and environmental assessment required for drug approval.

MUMs Rx can be searched by drug name, active ingredient and species to find drugs and withdrawal information available for use in minor food species.

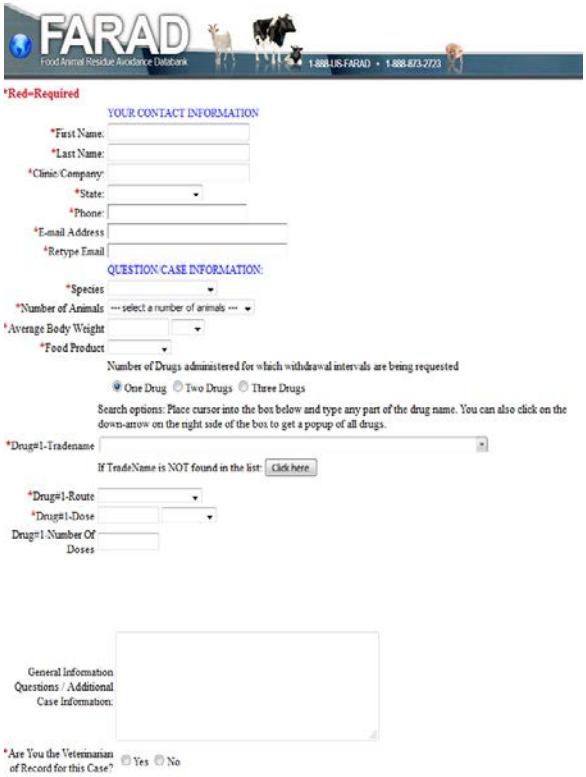
Residue Avoidance Mitigation

Visit **farad.org** or call **1-888-US-FARAD** to submit general questions or receive advice regarding residue avoidance.



This is a free service for licensed veterinarians, extension specialist and regulators. Federal law prohibits extralabel drug use by non-veterinarians. However, producers are encouraged to have their veterinarians contact FARAD for any matter relating to extralabel drug use in all food animal species.
