

## APPROVED VETERINARY FEED DIRECTIVE (VFD) COMBINATIONS IN CATTLE

### Chlortetracycline can be fed with

- Decoquinatate
- Laidlomycin
- Lasalocid
- Sulfamethazine

### Sulfamethazine can be fed with

- *Chlortetracycline*

### Decoquinatate can be fed with

- *Chlortetracycline*
- Monensin and *Tylosin*

### Laidlomycin can be fed with

- *Chlortetracycline*

### Lasalocid can be fed with

- *Chlortetracycline*
- *Oxytetracycline*<sup>1</sup>
- MGA and *Tylosin*

### Lubabegron can be fed with

- Monensin
- Monensin and *Tylosin*

### Melengestrol acetate (MGA) can be fed with

- *Oxytetracycline*<sup>1</sup>
- *Tylosin*
- Lasalocid and *Tylosin*
- Monensin and *Tylosin*
- Monensin and Ractopamine and *Tylosin*
- Monensin and *Tylosin* and Zilpaterol

### Monensin can be fed with

- *Tilmicosin*
- *Tylosin*
- Decoquinatate and *Tylosin*
- MGA and *Tylosin*
- Ractopamine and *Tylosin*
- *Tylosin* and Zilpaterol
- MGA and Ractopamine and *Tylosin*
- MGA and *Tylosin* and Zilpaterol

### Neomycin can be fed with

- *Oxytetracycline*<sup>1</sup>

### Oxytetracycline<sup>1</sup> can be fed with

- Lasalocid
- MGA
- *Neomycin*

### Ractopamine can be fed with

- Monensin and *Tylosin*
- Monensin and MGA and *Tylosin*

### Tilmicosin can be fed with

- Monensin

### Tylosin can be fed with

- MGA
- Monensin
- Lasalocid and MGA
- MGA and Monensin
- Monensin and Decoquinatate
- Monensin and Ractopamine
- Monensin and Zilpaterol
- Monensin and MGA and Ractopamine
- Monensin and MGA and Zilpaterol

### Virginiamycin

- No approved combinations

### Zilpaterol can be fed with

- Monensin and *Tylosin*
- MGA and Monensin and *Tylosin*

### Medically Important Antibiotic Drugs (MIADs)

<sup>1</sup>For use in dry animal feed only. Not for use in liquid feed supplements.
